[Email](#) | [GitHub](#) | [Medium](#) | [LinkedIn](#)

Software Engineer graduate from New York City with fundamental knowledge of web development, design and testing.  
Seeking to join a dev team I can support with my skills and help drive to success.

## TECHNICAL PROJECTS

### COVID-19 Tracker - [Backend](#), [Frontend](#) | [Website](#)

*A data tracking and visual tool*

- + Users can create a profile and save a location's information.
- + Interactive world map with tooltips on hover displaying data for that country.
- + Bar graph that highlights the selected country and displays data as well.
- + International news stories relating to the virus that switches out the graph.

### Gadget Pro Shop - [GitHub](#) | [Demo](#) | [Website](#)

*A mock e-commerce site with a PayPal SDK*

- + Users can create a profile and keep a cart saved with items in it.
- + Admin privileges can be given to any user and are able to add/edit/remove products and basic users.
- + PayPal SDK implemented for an easier way to process payments.
- + Session persistence and authorization included.

### HANX! The Tom Hanks fan site - [Backend](#), [Frontend](#) | [Demo](#) | [Website](#)

*A mock e-commerce and fan site utilizing a styling library*

- + Scroll through a selection of movies featuring Tom Hanks, each with their own info page and link to the trailer.
- + Navigate through various pages with the Menu bar on the top page, persisting a user's state all throughout.
- + Add and remove Tom Hanks memorabilia to a cart that pops up from the side of the page.
